

Collibra Usage Analytics

Real-time actionable insights on the usage of the Collibra platform

As organizations begin to unite around data, understanding which data is getting used by which users is key. Without these types of insights, teams struggle to understand which users are engaging with their data intelligence platform, what data is most relevant for them, and the impact their adoption campaigns are having across the organization.

Collibra Usage Analytics provides organizations with real-time actionable insights on the usage of their Collibra Data Intelligence Cloud. This increased visibility into who is using what data asset enables teams to understand which data is most relevant and look for other similar types of data to curate. It also provides an easy way for teams to proactively monitor adoption and take the necessary actions to help maximize their investments in data intelligence. Collibra Usage Analytics is now available as part of the Collibra Data Intelligence Cloud.

Collibra Usage Analytics provides organizations with real-time actionable insights on the usage of their Collibra Data Intelligence Cloud.

Benefits

Faster time to insights

Out-of-the-box analytics showing you who is using Collibra, how many new users you have, and who has access but isn't using it, helping you quickly understand usage and the effectiveness of your adoption efforts.

Increase adoption

Usage Analytics dashboard enables you to quickly and easily see real-time data about who is using Collibra and what they are using, ensuring you have the data you need to understand and improve usage across the organization.

Improve visibility

Real-time analytics show you which communities, domains, and assets are being used most and which are not being used at all, so you can improve usage and optimize your ROI.

Product highlights

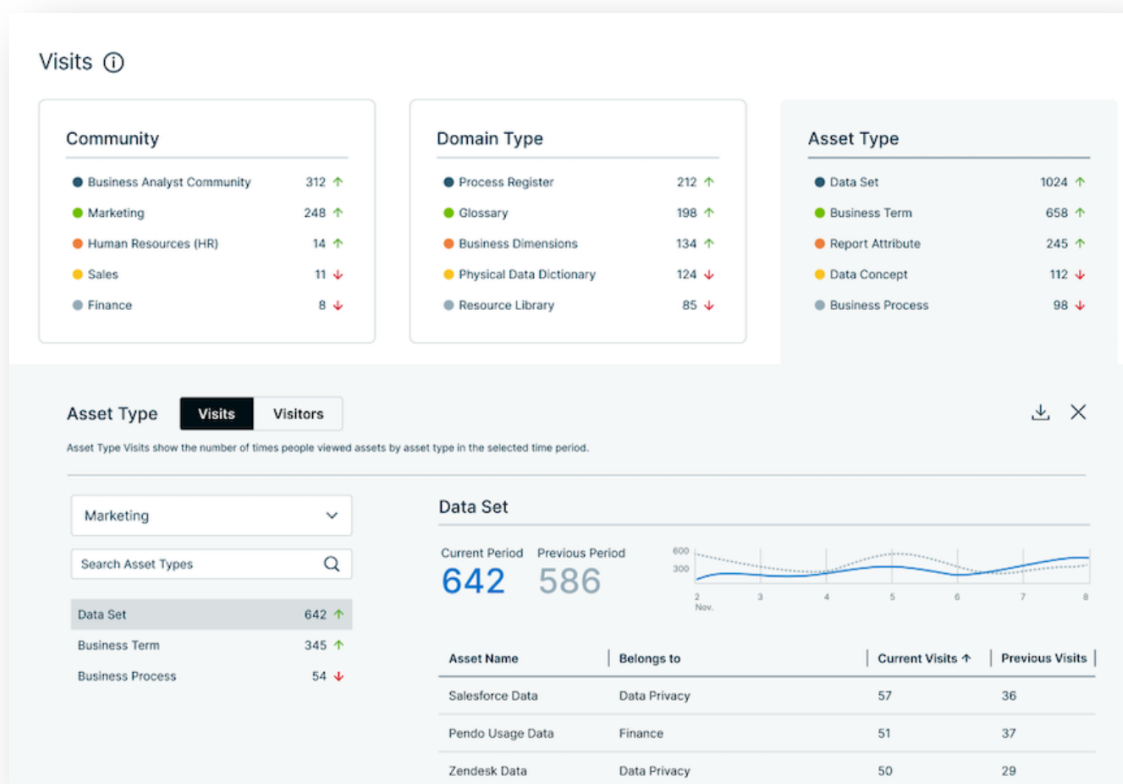

Interactive dashboard provides real-time visibility into key metrics around usage of the Collibra Data Intelligence Cloud

Real-time visibility of the communities, domains, and assets being used most and least, with the ability to dive deeper into the details with just one click.

Out-of-the-box analytics on visits, allows you to see which new users you have, who your top users are, and who has access but isn't using it.

Easily see who is using the platform along with which communities, domains, and assets are being used most
