Announcements

End of maintenance support on-premises environments

To continue to focus on the world-class cloud experience you deserve, Collibra will end maintenance support for on-premises environments on **December 31, 2022**. To discuss the next steps for your migration to cloud, please contact your customer success manager.

Please note this notification is not applicable for our Federal customers **at this point in time**.

Internet Explorer 11

Beginning September 2021, Collibra will no longer support Internet Explorer 11 to ensure security and optimize platform performance. Although you will still be able to use Collibra DGC on IE11, we will deprecate our support for IE11 and recommend you move to one of our many other [supported browsers](#).

Refreshed navigation

Refreshed navigation is now enabled by default in product environments. Your Collibra DGC environment will be automatically updated with the 2021.11 release.

You can learn more about the improvements in [this video](#).

Deprecation Collibra Everywhere for iOS

Collibra will end support for Collibra Everywhere for iOS in November 2021. We will remove it from the App Store in September 2021. To access Collibra DGC from your iOS device, please use Collibra for Mobile, which you can download from the [App Store](#) now.

Deprecation Collibra Everywhere for Excel

Collibra will end support for Collibra Everywhere for Excel in November 2021. You will no longer be able to download the plug-in beginning September 2021.

Deprecation TLS 1.2 weak ciphers

[TLS 1.2 weak ciphers](#) are deprecated on Sunday, May 23, 2021. It will be replaced by TLS 1.3 in 2021.06 and newer.

Collibra Data Governance Center On-Premises

The content of this section is only available for Collibra Data Governance Center on-premises environments. For the release notes of Collibra Data Intelligence Cloud, see [Collibra Data Intelligence Cloud 5.7](#).

Note Please note, some items included in this release may require an additional cost. Please contact your Collibra representative or Customer Success Manager with any questions.

5.7.12

The content of this section is only applicable for on-premises Collibra Data Governance Center environments. For the release notes of Collibra Data Intelligence Cloud, see [Collibra Data Intelligence Cloud 5.7](#).

Important To continue to focus on the world-class cloud experience you deserve, Collibra will end maintenance support for on-premises environments on **December 31, 2022**. To discuss the next steps for your migration to cloud, please contact your customer success manager. Please note that this notification is not applicable for our Federal customers at this point in time.

- [New features](#)
- [Enhancements](#)
- [Fixes](#)
- [Patches](#)

Release information

- Release date of 5.7.12: February 28, 2022
- Release date of 5.7.12-1: March 17, 2022
- Release date of 5.7.12-2: April 1, 2022
- Release date of 5.7.12-3: April 14, 2022

Highlights

- iOS 11 is no longer supported for Collibra for Mobile 1.5.2 and newer.

New features

Data Catalog

- The Jobserver component has been updated and requires an upgrade.
- You can now use partial scan to profile Google BigQuery data sources via Jobserver.
- You can now use partial scan to profile most columns of Impala data sources via Jobserver, except for those in views, Kudu tables, and HBase tables.

Data Governance

- The Scope page is now redesigned to make it more user friendly. For example, you can now easily see which domains and communities belong to which scope, and you also see a warning if a community or domain is in multiple scopes.
- You can now use views on the Organization page of the Stewardship application.

Collibra for Desktop

- You can now change the colors and logo of Collibra for Desktop to be more in line with your company's brand.
- When the user settings are disabled, the keyboard shortcut is no longer visible in the user settings.

- Via the unattended installation, you can now only configure the environment URL, session timeout and initial message. All other options can only be configured via Collibra Console.
- The following settings can now only be defined in Collibra Console and no longer in the Collibra for Desktop settings:
 - Default filter
 - Reporting
- In Collibra Console, you can now configure to automatically open Collibra for Desktop when you sign in to your operating system.
- Collibra for Desktop now correctly shows diagram pictures that are public or shared with the Everyone group. (ticket #73212, 74810)

Collibra for Mobile

- iOS 11 is no longer supported for Collibra for Mobile 1.5.2 and newer.

Enhancements

Data Catalog

- The import functionality now groups commands in batches internally so that commands that have dependencies are executed after their dependencies. For example, domains are always created before assets and assets are always created before their relations.

Data Governance

- You can now use views on the Organization page of the Stewardship application.
- You can now only use refreshed navigation, classic navigation is no longer available.
- If moving a domain or community causes a conflict of scopes, the moved domain or community is removed from its original scope.

Assessments

- URLs for conducting assessments are simplified, to facilitate the integration of assessments in dashboards and workflows.

Note When implementing this change, we also adjusted the terminology used in the URL to reflect terminology used in the Assessments app. This could result in broken links if you use the URLs outside of the Assessments app. We encourage you to verify such links if you use them, for example, in dashboards or workflows.

Diagrams

- You can now [configure](#) business qualifier filtering for complex relations.

Search

- Elasticsearch is upgraded to version 7.16.2, which includes an upgrade of log4j to version 2.17.0 and mitigations for the following log4j vulnerabilities:
 - [CVE-2021-44228](#) (December 10, 2021)
 - [CVE-2021-45046](#) (December 14, 2021)
 - [CVE-2021-45105](#) (December 18, 2021)

For technical information regarding the Elasticsearch 7.16.2 release, please consult the [Elasticsearch release notes](#).

Collibra for Mobile

- The Expo SDK is upgraded to version 43 to fully support iOS 15.
- General performance and stability improvements.

API

- The OutputVisitor component is now decoupled from the dgc-model package to improve performance. However, custom multi-node queries in the GraphQL Engine no longer work.

- Collibra now stores communities and domains in the same database, which may affect some API queries.

Miscellaneous

- When adding responsibilities or view permissions to an asset, the time to load the users or groups in the dropdown is significantly reduced.
- The time to load the Quality tab on asset pages is significantly reduced.(ticket #67755, 74771)
- Java JRE is now upgraded from version 8.0.292 to latest patch version 8.0.312 to improve security. (ticket #75764)
- Elasticsearch is upgraded to the latest version, with mitigations for the following log4j vulnerabilities:
 - [CVE-2021-44228](#) (December 10, 2021)
 - [CVE-2021-45046](#) (December 14, 2021)

For technical information regarding the Elasticsearch 7.16.1 release, please consult the [Elasticsearch release notes](#).

Fixes

Data Catalog

- If you have the Technical Lineage global permission, you can now see the **Technical Lineage** tab on the Database View asset page. (ticket #70049)
- If the synchronization via Jobserver of an S3 file system fails and leads to partial results, Collibra DGC no longer deletes affected assets but gives them the 'Missing from source' status. During the next successful synchronization, the assets are deleted or their status is restored. (ticket #69705, 71673, 76936)
- Fixed an issue where Collibra DGC didn't delete your previously saved sample data after refreshing with 'Store Sample Data' disabled. (ticket #71425, 74017)
- Attributes that are numbers no longer cause the import dialog box to get stuck loading (ticket #72920).
- Attributes containing plain text with special characters (<>) now expand correctly in tables (ticket #72613).

Data Governance

- You can once again search the organization in the Browse pane if a custom context path is configured. (ticket #71835)
- You can once again open communities in a new tab page from a link. (ticket #80081, 81342)
- You can once again export asset views with a filter on roles. (ticket #73570, 74060, 74103, 74336, 74471, 74521, 74788, 74929, 75195)
- You can now wrap text in asset tables of Catalog application pages.
- You can now use the Recently Viewed section to easily find the relevant assets in fields of the Diagrams and the Collibra Privacy & Risk features.
- You can now create a filter based on asset types of all subcommunities in the filter pane of a root community page. (ticket #71357, 76104)
- You can again sort asset views and diagram views on the Sharing column. (ticket #67365)
- The References tab page of asset pages now show references to assets with parentheses in their names. (ticket #67907)
- The popup that appears if you point to a hyperlink in an attribute now shows long breadcrumbs correctly. (ticket #76626)
- The height of the Browse pane now matches the full height of the page.
- Long names of domains and communities are now correctly shown in dropdown fields. (ticket #72524, 76725)
- Log messages about signing in and out no longer include implementation details and, whenever possible, now contain the user ID instead of the username.DEV-10164
- If you open an asset page from a relation table, the asset page now opens at the start of the page. (ticket #67587)
- If an asset appears many times in an hierarchical asset view and you select one of those instances, all asset instances are now selected. (ticket #70573)
- Fixed an issue with exporting asset views which were sorted on an attribute column. (ticket #74929, 75195, 76850)
- Fixed an issue which caused some dashboards to load twice. (ticket #69451)
- Fixed an issue where your browser's Back button didn't behave correctly. (ticket #73869, 75054, 75110, 75277, 75323, 76084, 76157, 76220, 76392, 76559, 76699, 77075, 77223)

- Fixed an issue where the Task Duration widget in a dashboard kept spinning indefinitely. (ticket #71492)
- Fixed an issue where the global Create button disappeared if you didn't have certain resource permissions. (ticket #69606, 73803, 74076, 74157)
- Fixed an issue where the Automatic Hyperlinking feature sometimes created hyperlinks to assets whose type was excluded in the configuration.
- Fixed an issue that occurred when editing cells in the Group column of the users table. (ticket #74109)
- Fixed an issue in the tables of the Migration export feature that have a Modified by column containing a user that was deleted. (ticket #74188)
- Fixed an issue in the error message that appears if you import complex relations with too many legs. (ticket #73694)
- Fixed an issue in the Complex Relation Type field when importing complex relations. (ticket #75736)
- Dashboard widgets now show Tableau reports correctly. (ticket #70820, 72848, 74431, 80669)

Assessments

- When completing an assessment, answers that are provided for questions of the type Multiline Input are again correctly formatted.
- If, on multiple attempts, you try to submit an assessment but don't have the necessary permissions for the specified domain or domains, only a single instance of the draft is now saved.
- Assessment templates with very long names no longer cause the UI to malfunction.

Diagrams

- You can again sort asset views and diagram views on the Sharing column. (ticket #67365)

Data Privacy

- You can again start your Collibra DGC environment, even if you don't have an active Internet connection.
- Error logs for time-based workflows now show the correct messaging.

Workflows

- You can again use the "T" designator when defining user task duration variables. (ticket #74215, 72645)
- Using double quotes in some dialog box forms no longer causes a display issue. (ticket #69491)
- Using check boxes or radio fields without any options no longer distort the dialog box layout. (ticket #70865, 69495)
- The runAsUser logic from one workflow no longer influences other workflow instances. (ticket #71828)
- The packaged Assessments Approval workflow is no longer enabled during an upgrade or restart if it was previously disabled. (ticket #75138, 70476)
- Search fields in dialog boxes of workflows now correctly filter on asset types and show all relevant assets. (ticket #76946, 80426)
- Completing a workflow task in the task bar no longer causes a task bar refresh error in some cases.
- Completing a workflow on a dashboard page no longer hides the page's scrollbar.

Search

- When you edit a tag, the new name is now indexed in the search database and assets can be found by the new tag name.
- In the Organization facet, the links to expand the organizational hierarchy again work correctly.
- Improved performance of the "Show more" and "Show less" buttons associated with the Organization facet.
- If you have specified fields in which a search should be performed and the search yields no results, you can again change the fields on the search page, to expand the scope of your search.
- Fixed the Search REST API example in the API documentation. (ticket #73115)

Collibra for Desktop

- Long names of related assets are now properly wrapped.
- If the user configuration is disabled in Collibra Console, you can no longer edit the keyboard shortcut. (ticket 76829)

- Date and time is now correctly shown in Collibra for Desktop. (ticket #76283)
- Collibra for Desktop now correctly shows diagram pictures that are public or shared with the Everyone group. (ticket #73212, 74810)

Collibra for Mobile

- When you click a shared link in Collibra for Mobile, the correct asset is now shown.
- The option to secure the user credentials is now correctly saved, even after signing out.
- Replying to a comment a second time, no longer results in an exception error.
- Reopening a shared link in Collibra for Mobile no longer makes the app crash.
- Opening a shared link in a mobile browser, now correctly shows "Open in mobile" instead of "Open in desktop".
- If you search for a value in a drop-down list in a workflow step and remove your search query, the drop-down list is again reset.

Security

- Users no longer encounter sign in issues during an active LDAP synchronization. (ticket #72891, 75184)

API

- The `typeld` parameter of the GET/Assets is now deprecated in favor of `typelds`. (ticket #75809)
- The REST Import API documentation now mentions that the finalization method requires at least one of the optional parameters to be specified.
- The REST Core API now correctly supports the "Responsibility" field. (ticket #73379)
- The data classification DELETE rest api (`/dataClassification/classifications/{classificationId}`) now returns the 404 response code instead of 500 if no classification with given `classificationId` exists in the system.
- JSON requests with malformed JSON, such as syntax errors and missing JSON fields, now result in standard API error responses.
- Fixed an error in the response schema for the POST `/assetTypes/bulk` and POST `/attributeTypes/bulk` methods of the REST Core API v2. (ticket #74894)

Miscellaneous

- An empty menu item in the configuration no longer prevents upgrading from version 5.6.

Patches

Patch 1

- Jobserver has been upgraded to a higher version (2022.02.0-47) to improve security. We recommend you to install this new Jobserver version without delay to remediate the vulnerabilities.

Patch 2

- Signing in via LDAP is now faster. (ticket #79896, 83727)
- The Browse pane no longer contains domains and communities for which you don't have view permissions. (ticket #82447, 82986, 83313, 83393, 83470)
- You can again use the 'BETWEEN' filter in the Output Module. (ticket #83068, 83202)
- Azul Zulu JRE (Java Runtime Environment) is updated to version 8.0.322. Jobserver has also been upgraded to version 2022.2.3-58 to support this JRE version. (ticket #83442)
- The Postgres driver is upgraded to org.postgresql 42.3.3.

Patch 3

- Log4j 1.2.17 dependency has been removed. (ticket #82988, 83442)
- Fixed an issue where some pages in the UI did not load if the following settings are active "Enable simple joins" and "Enable joins for view permission filtering". (ticket #83715)

Upgrading to Collibra DGC 5.7.12

You can upgrade to Collibra Data Governance Center 5.7.12 from Collibra DGC versions:

- 4.5.x
- 4.6.x
- 5.0.x
- 5.1.x
- 5.2.x
- 5.3.x
- 5.4.x
- 5.5.x
- 5.6.x

For more information, see [Installation and upgrade](#).

Tip

- If we upgrade your Collibra Data Intelligence Cloud environment and you have an on-premises Jobserver installation, you will have to upgrade your on-premises installation if possible.

The installer for on-premises installations will only be available on a quarterly basis while your Collibra Data Intelligence Cloud environment can be upgraded on a monthly basis. If your Collibra Data Intelligence Cloud environment doesn't have a corresponding on-premises installer, make sure that your on-premises Jobserver and Collibra Console are installed with the latest available installer. Check the [compatibility list](#) to know which installer you have to use.

- When you upgrade to 5.7 or newer, [characteristics of some Catalog-related assets](#) are converted from rich-text format to plain-text format.

Compatibility

For more information on the system requirements for on-premises installations, see [System requirements](#).

You can download all the necessary files for this release on the [Collibra Downloads page](#).

Supported web browsers

Important Beginning September 2021, Collibra will no longer support Internet Explorer 11 to ensure security and optimize platform performance. Although you will still be able to use Collibra DGC on IE11, we will deprecate our support for IE11 and recommend you move to another [supported browser](#).

Browser	Version
Mozilla Firefox	52.4.1 or newer
Google Chrome	31 or newer
Microsoft Edge	All versions
Microsoft Internet Explorer	11

Compatibility between Jobserver and Collibra DGC

The following table shows which Jobserver version you have to use for each Collibra Data Governance Center version.

For Collibra Data Governance Center version...	use Jobserver-only on-premises version	or Full on-premises installer version
<ul style="list-style-type: none">• 2022.02	2022.2.3-58	5.7.12-2
<ul style="list-style-type: none">• 2022.01• 2021.11	2021.11.3-77	5.7.11

For Collibra Data Governance Center version...	use Jobserver-only on-premises version	or Full on-premises installer version
<ul style="list-style-type: none"> • 2021.10 • 2021.09 	2021.09.0-51	5.7.10
<ul style="list-style-type: none"> • 2021.07 • 2021.06 • 2021.05 	2021.05.0-13	5.7.9
<ul style="list-style-type: none"> • 2021.04 • 2021.03 	2021.03.0-38	5.7.8
<ul style="list-style-type: none"> • 2021.01 • 2020.12 • 2020.11 	2020.11.2-42	5.7.7
<ul style="list-style-type: none"> • 2020.10 	n/a	5.7.6

Compatibility between cloud and on-premises versions

We are releasing Collibra Data Governance Center environments on a monthly basis and Collibra Data Governance Center environments (on-premises) on a quarterly basis.

A quarterly on-premises release includes all fixes and features, unless it is a cloud-only feature, of the previous monthly cloud releases. For example, on-premises version 5.7.7 includes all fixes and features of 2020.09 to 2020.11.

The following table shows the compatibility between the cloud and on-premises versions:

Collibra Data Governance Center version...	contains the content of Collibra Data Governance Center versions...
5.7.7 (released with 2020.11)	2020.09, 2020.10, 2020.11
5.7.8 (released with 2021.03)	2020.12, 2021.01, 2021.03
5.7.9 (released with 2021.05)	2021.04, 2021.05

Collibra Data Governance Center version...	contains the content of Collibra Data Governance Center versions...
5.7.10 (released with 2021.09)	2021.06, 2021.07, 2021.09
5.7.11 (released with 2021.11)	2021.10, 2021.11
5.7.12 (released with 2022.02)	2022.01, 2022.02

Backups

You can also restore backups from a cloud environment on an on-premises environment as long as the cloud version is not newer than the on-premises environment. The following table shows which cloud backups you can restore on which on-premises version.

If you are running Collibra Data Governance Center version...	you can restore backups from Collibra Data Governance Center version...
5.7.7 (released with 2020.11)	2020.11 and older
5.7.8 (released with 2021.03)	2021.03
5.7.9 (released with 2021.05)	2021.05 and older
5.7.10 (released with 2021.09)	2021.09 and older
5.7.11 (released with 2021.11)	2021.11 and older
5.7.12 (released with 2022.02)	2022.02 and older

If you are running Collibra Data Governance Center version...	you can restore backups from Collibra Data Governance Center version...
2020.09, 2020.10, 2020.11	5.7.7 and older
2020.12, 2021.01, 2021.03	5.7.8 and older
2021.04, 2021.05	5.7.9 and older
2021.06, 2021.07, 2021.09	5.7.10 and older

If you are running Collibra Data Governance Center version...	you can restore backups from Collibra Data Governance Center version...
2021.10, 2021.11	5.7.11 and older
2022.01, 2022.02	5.7.12 and older (release date 28 February 2022)

Feature availability

Not all features are enabled by default. Some features can be enabled by the customer, others only by Collibra. The following table gives you an overview of features that are not enabled by default. If **Enable by customer** is active, you can enable the feature in Collibra Console, if not, you have to submit a support ticket to enable the feature.

Feature	Must be enabled by Collibra	Must be enabled by customer	Planned version to become enabled by default
Assessments	No	Yes	Is enabled by default.
Edge usage	No	Yes	2021.09
Enable the Data Quality extraction tab on a database asset	No	Yes	Not yet defined
Enable responsibility inheritance from higher levels in Table asset views	No	Yes	Not yet defined
New settings landing page in Collibra DGC	No	Yes	2021.10
Refreshed navigation	No	Yes	2021.11
Register data source via Edge	No	Yes	Not yet defined
Disable custom validation functions to reduce security risks.	Yes	No	Not yet defined

Feature	Must be enabled by Collibra	Must be enabled by customer	Planned version to become enabled by default
Enable the Lineage tab on a database asset	Yes	No	Not yet defined
Enable the Profiling tab on a database asset	Yes	No	Not yet defined
Filter rules on a database asset	Yes	No	Not yet defined
Locally managed groups	Yes	No	Not yet defined

Overview build numbers

For 5.7 versions older than 5.7.7, there is a difference between the build number that is shown in Collibra Data Governance Center and in Collibra Console. For those versions, the installation files have the build number that is shown in Collibra Console. The installer contains among other files, the Collibra DGC package, which has a different build number. This is the build number that is shown in Collibra DGC.

These are the build numbers of all 5.7 releases prior to 5.7.7:

Installer build number	Collibra DGC build number
5.7.0-60	5.7.0-59
5.7.1-19	5.7.1-20
5.7.1-23	5.7.1-22
5.7.2-4	5.7.2-3
5.7.2-9	5.7.2-8
5.7.2-13	5.7.2-12
5.7.2-14	5.7.2-12

Installer build number	Collibra DGC build number
5.7.2-16	5.7.2-14
5.7.3-25	5.7.3-19
5.7.4-14	5.7.4-10
5.7.4-20	5.7.4-18
5.7.4-22	5.7.4-20
5.7.4-26	5.7.4-22
5.7.4-29	5.7.4-26
5.7.4-39	5.7.4-40
5.7.4-42	5.7.4-43
5.7.5-44	5.7.5-46
5.7.5-49	5.7.5-54
5.7.5-50	5.7.5-55
5.7.5-53	5.7.5-58
5.7.5-65	5.7.5-71
5.7.5-77	5.7.5-90
5.7.6-103	5.7.6-125

Component versions

Component	Product	Version
Virtual Machine (jreVersion)	Azul Zulu JRE	Azul Zulu 8.0.312

Component	Product	Version
Repository (postgresVersion)	PostgreSQL	10.17
Jobserver (sparkVersion)	Spark	2.4.8-collibra-11
Search	Elasticsearch	7.16.2

API updates

- [Deprecated API v1](#)
- [DGC Core compatibility report](#)
- [DGC API compatibility report](#)

Deprecated API v1

In an earlier version of Collibra Data Governance Center, we introduced [Core API v2](#) next to Core API v1. From version 5.5.0 onwards, we have marked some API v1 interfaces, classes, methods, fields and enumerations as deprecated. You can open an overview of all Core API v1 deprecated content by following the **DEPRECATED** link of the Core API v1 documentation.

The screenshot shows the Collibra API documentation interface. At the top, there is a navigation bar with links: OVERVIEW, PACKAGE, CLASS, TREE, **DEPRECATED** (highlighted in orange), INDEX, and HELP. Below this, there are links for PREV, NEXT, FRAMES, and NO FRAMES. A green arrow points to the **DEPRECATED** link. The main content area is titled 'Deprecated API' and has a 'Contents' section listing: Deprecated Interfaces, Deprecated Classes, Deprecated Fields, Deprecated Methods, and Deprecated Enum Constants. Below this, there is a section titled 'Deprecated Interfaces' with a sub-section 'Interface and Description' listing several interfaces: com.collibra.dgc.core.component.activity.ActivityStreamComponent, com.collibra.dgc.core.component.bootstrap.BootstrapComponent, com.collibra.dgc.core.component.CompareComponent, and com.collibra.dgc.core.component.ConfigurationComponent. On the left side, there is a sidebar with 'All Classes' and 'Packages' sections, and a section for 'Interfaces' listing AttributeComponent and AttributeTypeComponent.

Deprecated means that you can still use the content in this version, but we recommend to migrate to Core API v2. If the deprecated content has an alternative in Core API v2, it will be clearly indicated in the documentation as shown in the following example:

The screenshot shows the documentation for the `com.collibra.dgc.core.component.activity` package, specifically the `Interface ActivityStreamComponent`. It is marked as 'Deprecated.' with the annotation `@Deprecated` and the Java code `public interface ActivityStreamComponent`. Below this, there is a 'Method Summary' section with tabs for 'All Methods', 'Instance Methods', 'Abstract Methods', and 'Deprecated Methods'. The 'Deprecated Methods' tab is selected. It shows a method `getActivities(com.collibra.dgc.core.dto.activity.ActivityParameters activityParameters)` with a 'Deprecated.' note. A green arrow points to this note, and another green arrow points to a 'Use' link that directs to `com.collibra.dgc.core.api.component.activitystream.ActivityStreamApi#getActivities(FindActivitiesRequest)`.

If there is no alternative available in API v2, we recommend to file a [support ticket](#) or a feature request on the [Collibra Ideation platform](#).

Known issues

The following is a non-exhaustive list of issues that we have encountered in this release. We intend to fix these issues as quickly as possible.

Ticket	Issue	Found in	Fixed in
	Time-based review rules that were configured to trigger Time based asset review workflows on an annual basis, did not start at the beginning of the calendar year 2022. We strongly recommend that you review any Time-based Review Rule assets you have configured, to see if there are target assets that should be reviewed. Read more.	2022.01	2022.04 (to be confirmed)
#76160, 76225	Collibra DGC becomes unresponsive after signing in due to an error in the referrer. Read more.	2021.11	2022.01 (to be confirmed)
	The start form does not have a scrollbar when you start a workflow on an asset that has another task open in the sidebar.	2021.07	2021.09
	The description of workflows is not shown on the workflow definition page.	2020.11	2021.01
#54533, 54695	An error message is erroneously shown when you delete an asset.	2020.10	2020.11
	A data source ingestion fails if a foreign key has the same name as a table.	5.5	

Common issues

- The Collibra Data Governance Center 5.7.2-13 release fixed performance issues with the Escalation Process workflow.

To take advantage of the improvements, you must deploy the [new version](#) of the Escalation Process workflow in your Collibra DGC 5.7.2-13 or newer.

Note If you are using a modified Escalation Process workflow, you must port your changes to the new workflow.

Warning The new Escalation Process workflow is only valid for Collibra DGC 5.7.2-13 or newer.

- Workflows with different values for the `processRef` attribute of the `participant` tag and the `id` attribute of the `process` tag are not working in Collibra DGC 5.6.0 or newer, despite having worked in older versions. These workflows have invalid BPMN files that cause a `java.lang.NullPointerException` error, visible in the Collibra Console logs. For more details, see the [troubleshooting section](#).
